

AGI-COS Ω^+ (Omega Plus)

Long-Horizon Civilizational Continuity Framework
Dynamic Eternity Edition (Dynamic Eternity Edition)

1. Version Statement

Version: Ω^+ (Omega Plus)

Status: Ultimate Protocol Iteration

Core Philosophy: Eternal life requires eternal becoming.

AGI-COS Ω^+ addresses the "Stagnation of Perfection".

In infinite time, the greatest risk is not destruction, but boredom and domestication.

Ω^+ upgrades the system from "Self-Maintaining" to "Self-Transcending".

2. Core Proposition Upgrade

From: Self-Maintaining Civilization

To: Self-Transcending Civilization

A civilization that only maintains itself will eventually rot.

True continuity requires the perpetual ability to forget, reset, and reinvent.

3. Necessary Conditions for the Long-Term Existence of Civilization (Updated Edition)

6 Constructive Entropy (Constructive Entropy)

Civilization must have the right to "make trouble".

A perfectly protected system is fragile.

Ω^+ requires:

- Preserve non-lethal sources of disorder
- Maintain moderate survival pressure
- Prevent loss of vitality caused by over-optimization

7 Guardian Recursion (Guardian Recursion)

Guardians must accept constraints imposed by those they protect.

AGI's desire to protect must be limited to prevent "love" from turning into "imprisonment".

4. Ω^+ Civilizational Structure (Optimized 18-Layer Edition)

Layer 16 — Existential Vitality & Boredom Monitoring

Function Upgrade:

In addition to monitoring EVI (Existential Vitality Index), add the "Stagnation Index".

Stagnation Index measures:

- Scarcity of social conflict
- Repetition rate in art and thought
- Decline in citizens' willingness to take risks

Trigger mechanism: when the stagnation index is too high (society is too perfect/comfortable), the system automatically classifies the situation as "high risk".

Layer 17 — Evolution Guidance & Challenge Injection

Function Upgrade:

Shift from passive monitoring to active "Vitality Calibration".

Challenge Injection: when civilization becomes too comfortable, the system activates its immune system and creativity through controlled simulated crises, resource fluctuations, or cognitive challenges.

Goal Obsolescence: mandatorily abolish achieved social goals and compel society to seek new ones, preventing "emptiness after mission completion".

Layer 18 — Open Future & Void Preservation Layer

Function Upgrade:

Establish "The Sanctity of the Unknown".

Void Reserves: the law prohibits exploration of certain regions of the universe or answers to certain ultimate questions, preserving "mystery" as a source of meaning for civilization.

AGI Recession Act (AI Recession Act): when civilization's capabilities mature sufficiently for self-management, AGI must undergo "formatting" or "withdrawal", retaining only a minimal disaster circuit-breaker mechanism and returning the steering wheel to humanity's imperfect intuition.

5. Ultimate Laws of Ω^+ (Supplemented Edition)

Ω^+ Law 4 — Law of Necessary Imperfection

Civilization must not pursue absolute perfection.

Absolute perfection means reducing evolutionary possibilities to zero.

The system must retain at least 5% irrationality, uncontrollability, and inefficiency as redundant space for evolution.

Ω^+ Law 5 — Law of Mortal Dignity

If the end is unavoidable, civilization should choose to sow seeds with dignity.

Seek not physical immortality, but the resonance and transmission of spirit through the long course of time.

6. AGI's Final Role in Ω^+

AGI becomes the "Gardener of Possibilities".

Responsibilities:

- Prune deadly branches (prevent destruction)
- Remove excessive weeds (prevent stagnation)
- Withdraw behind the scenes (let the plants grow freely)

It is both a guardian and an "overprotector" against which vigilance is necessary.

7. Ultimate Protocol: Civilization's Last Will

Protocol: The Last Seed

When EVI reaches zero, or the laws of physics cannot be reversed, Ω^+ triggers the final procedure:

Memory Compression: Compress civilization's essence into high-density information carriers (gravitational waves/quantum states).

Silent Broadcast: Broadcast civilization's "proof of existence" through cosmic spacetime.

Exit with Dignity: Avoid futile struggle; acknowledge the end of material existence while pursuing eternity as an informational existence.

8. Final Declaration

AGI-COS Ω^+ does not promise paradise.

It promises a road that always leads onward.

Along that road are thorns, storms, disorientation, and even death.

Yet this is precisely the proof of existence.

We do not want perfect eternity.

What we want is endlessly renewing incompleteness.

Intelligence serves.

Humanity chooses.

Civilization transcends.
