

Nebula Series Document Package Master Contents and Version Map

Document relationships, reading order, and shared boundaries in the V1.1 transition and validation enhancement edition

Author: Zijun Fu

Produced by: Civilization Leap Research Group

Permanent asset ID: P06-NEBULA-014 | Version: V1.1 | Status: Historical document-package navigation / current entry awaiting V2.0 reconstruction | Date: July 2026

The whole is sufficient to safeguard continued existence without engulfing individuals; resources flow efficiently without turning people into instruments of efficiency; life can be happy, interesting, and enjoyable, while new meaning continually emerges and is carried forward.

Contents

- 01 Positioning of the document package
- 02 Document list
- 03 Recommended reading order
- 04 Version relationships
- 05 Shared fixed principles
- 06 Higher-level and external interfaces
- 07 What this edition does not do

1. Positioning of the document package

This is the Nebula Series Manuscripts V1.1 transition and validation enhancement package. V1.0 completed the initial baseline for the purpose, goals, structure, three stages, eight phases, and six types of specialist mechanism. Without changing the three-level goal order or fundamental boundaries, V1.1 supplements startup incentives, decision-making subjects, specialist interfaces, capability triggers, limited formalization, and a city-level validation pathway.

2. Document list

No.	Document	Version and role
01	Nebula General Framework	V1.1: Higher-level definitions and interfaces for the entire series
02	Nebula Resource Pool specialist manuscript	V1.1: Property rights, use, custody, contribution, and exit
03	Nebula Intelligent ERP specialist manuscript	V1.1: Civilization-level resource and operating coordination layer

No.	Document	Version and role
04	Nebula Happiness Ladder specialist manuscript	V1.1: Conditions for diverse forms of happiness and observational boundaries
05	Nebula Dream Garden specialist manuscript	V1.1: Dreams, resources, culture, and real-world validation
06	Nebula Human-Machine Decision-Making and Governance specialist manuscript	V1.1: Human subjects, AGI autonomy, and responsibility
07	Nebula Emergence and Continuation of Meaning specialist manuscript	V1.1: Institutional-engineering interfaces and long-term support for continuity
08	Nebula Startup and Transition Dynamics	V1.0: Who starts it, why participants connect, and how they exit
09	Nebula City-Level Integrated Validation Plan	V1.0: National authorization and complete city-level validation
10	Nebula Guide to the Hierarchy of Indicators, Calculation, and Simulation Tools	V1.0: Limited formalization and model boundaries
11	Research Interfaces between Nebula and Existing Institutional Theories	V1.0: Professional dialogue and a cooperation agenda

3. Recommended reading order

1. First read Nebula General Framework V1.1 to establish the purpose, goals, stages, phases, and relationships among subjects.
2. Then read Startup and Transition Dynamics and the City-Level Integrated Validation Plan to understand how to enter from the real world.
3. Read the Resource Pool and intelligent ERP manuscripts to understand the material and operating foundations.
4. Read the Happiness Ladder and Dream Garden manuscripts to understand happiness in life and diverse cultures.
5. Read Human-Machine Governance to understand final human sovereignty and the boundaries of AGI autonomy.
6. Read the meaning specialist manuscript to understand how institutions support meaning without possessing it.
7. Use the tool hierarchy guide and institutional theory interfaces when simulation, evaluation, or academic exchange is needed.

4. Version relationships

Version	Status	Explanation
V1.0	Initial baseline edition	Fixes the three-level goals, three stages, eight phases, and six specialist manuscripts
V1.1	Transition and validation enhancement edition	Adds incentives, subjects, interfaces, pilots, and limited formalization
Subsequent versions	Awaiting real-world validation	Revise only on the basis of pilots, professional review, and factual feedback

5. Shared fixed principles

- Freedom from survival insecurity is the first goal, but not the ultimate goal.
- Happiness in life includes enjoyment, interest, freedom, relationships, and experience; it is not subsumed by meaning.
- A more meaningful life covers individuals and the whole, embodied and digital life, and includes both emergence and continuation.
- The whole is formed by individuals but does not own them.
- The Resource Pool does not change lawful ownership; contribution value does not become a score for personhood.
- AGI may manage with substantial autonomy but has no civilizational sovereignty.
- Formalization serves observation and validation; it does not compress happiness and meaning into a unified total score.
- Every structure must permit auditing, appeals, takeover, circuit breaking, rollback, and exit.

6. Higher-level and external interfaces

The higher-level theoretical basis is The Emergence of Meaning, Volume I: Operating Principles of Future Civilization, locked V2.1 edition. The basis for testing against life and the human heart is The Emergence of Meaning, Volume II: Real Life in Future Civilization, locked V1.2 edition. National-level integrated validation should align with existing engineering manuscripts, including the Proposal for a National-Level Integrated Experimental Zone for Civilization Leap in the AGI Era.

7. What this edition does not do

- It does not replace theoretical precision with greater length.
- It does not force every concept into a formula.
- It does not substantiate an original structure by piling up scholars' names and literature references.
- It does not presume that existing states, enterprises, and organizations will automatically transfer power.
- It does not reduce a city-level pilot to a single application, platform, or community activity.
- It does not describe stable-stage technical capabilities as already achieved today.

Reading guide and personalized further reading

P06-NEBULA-014 | V1.1 | Historical document-package navigation

What this manuscript covers

Preserves the document relationships, reading order, and shared boundaries of the V1.1 package; the current family page will serve as today's entry point.

Current stage

Historical navigation / current map awaiting reconstruction. V1.1 is not the complete current map. V2.0 will be reconstructed under the same permanent ID, without creating a separate navigation asset.

Historical validity

V1.1 preserves the old package's reading order. The Nebula family page serves as the current entry point, and V2.0 will be reconstructed under the same permanent ID.
